VIBRO-FEEDER

## 00312

Constant and uniform feeding of granular and floury products as well as difficult flowing stocks.

Custom designed to handle difficult stocks such as low-grade flours obtained from bran finishers or filters, screenings, animal meals and others.

Product discharge from feeding hopper is assured by the oscillating motion of the semispherical baffle and anti-bridging bracket, vibrated by vibratory motors.

Feeding discharge chute complete with adjustable slide gate and inspection windows for visual control of flow operation.
