

## Ocrim plans special presentation at IPACK-IMA 2015

CREMONA, ITALY — Ocrim, which is celebrating its 70th anniversary this year, will present the latest news related to the engineering and technological field during IPACK-IMA 2015, May 19-23 in Milan, Italy.

On May 21, at its booth (Hall 3, B35-C34), the Ocrim team will combine the artistic-cultural approach with the technical-futuristic one. Guests will be received by the Ocrim team together with personalities from the show business world and the international culinary scene.

Ocrim said it is constantly investing in research and development, as well as in the communication and image sectors.

In addition to the presentation, Ocrim will have several speakers at IPACK-IMA. Marco Galli, manager of the technological department, will speak during the Semouliers Conference on May 21.

Galli will also speak during the General Assembly EFM on May 22. Fabio Vuoto, manager of the tendering and estimations

department, will present during the Technical Workshop ANTIM on May 23.

Ocrim has had 70 years of research, design, production and realization of milling plants, feed mills and cereals processing systems. Through 70 years of activity in the

mechanical industry, the company, despite great difficulties, has proudly maintained its production in Italy. Ocrim said that the preservation of the excellence that is "ITALIAN MADE" is a genuine trademark for the company.
